2. Description for Routes:

Index.js: Clicking on logo page, login, signup too leads to the main page that is the index page.

Similarly for about us and contact page. It leads to the information about the website or contact info respectively.

Editing or updating the page too has routes associated. Like by clicking on Start Glowing it will show up a form to fill the details about the product. And trade beauty tab will give a list of products available.

3. Screenshots of all the webpages:

About Us

Welcome to AyurDaily.

Kyra is an organic beauty product brand focusing on producing chemical free beauty products!

There are various products that can be traded. Please visit the Trade Beauty section.

Look-n-feel Natural!

Explanation of additional features, if any. - I have not added any additional features. In the web application, I have kept only those features and functionality which were mentioned in the instructions and demo video.

Explanation of status, stopping point, and issues if incomplete. - The application is completely developed and fully functional. There is no stopping point and didn't face any issue while developing the application. Almost all the tasks were easy to do. I also took help from platforms like Stack Overflow to get the possible solution.
